

Nestara Estates: Emergency Database SQL Cheat Sheet

Keep this document safe. These commands will permanently modify your Supabase database.

1. Delete Unwanted/Spam Test Users

If AI bots or testers spam your database, run this to securely wipe all accounts ending in @test.com:

```
DELETE FROM auth.users WHERE email ILIKE '%@test.com';
```

2. Force-Delete a Specific User (by Email)

If a user is violating terms and you need them gone instantly:

```
DELETE FROM auth.users WHERE email = 'spammer@example.com';
```

3. Force-Delete a Property (Bypass 7-Day Wait)

If you need to instantly wipe a property (and all its chats/images) right now without waiting 7 days:

```
DELETE FROM public.properties WHERE id = 'PROPERTY-UUID-HERE';
```

4. Un-Ban a Suspended User

If a user was accidentally banned from the Admin Panel, restore their account:

```
UPDATE public.profiles SET account_status = 'ACTIVE' WHERE id = (SELECT id FROM auth.users WHERE email = 'user@example.com');
```

5. Manually Trigger the 7-Day Cleanup NOW

If you don't want to wait until midnight to clear out deleted/sold properties, run this manually:

```
DELETE FROM public.properties WHERE status IN ('SOLD', 'CLOSED', 'DELETED') AND updated_at < NOW() - INTERVAL '7 days';
```
